

George Spiros

Interview conducted by
Cpl. Carl J. Rasins
Tpr. Richard Lowthorp

Date of Interview
~~March~~ 4-14-60

Spiros had been interviewed previously but had not given any information pertinent to this investigation. But on April 9, 1960 he came into the Cabin being used as an office and gave the following information to Lt. Toffant:

I had forgotten completely about the matter but since having talked to the men earlier and giving the matter a great deal of thought I finally recalled something that might be important. As I was leaving the Lodge on Monday March 14, 1960 at around ~~2:00~~ 2:00 P.M. enroute Evanston to visit my Mother as I got near Harbeshs when I noticed a couple of cars parked just this side of the houses.

As near as I can remember there were 2 cars parked there. One seemed to be an older model Cadillac, I believe it was black. The only thing I can remember about the other car was that it was grey in color. I also recall that there were three women standing alongside the Cadillac talking to some one in the car. The reason I seem to recall the cars was because the Cadillac was parked part ways on the road and I had to swing around the cars. That is all that I can remember about the incident."

It was noted at this time that George Spiros was wearing a red plaid jacket.

On April 9, 1960 George Spiros again contacted this office by telephone and had some more information which he had remembered. He had heard that a deer had been killed in Beer Park and that "They" had gotten away with it. He said further that some Indians had been seen in that area.

On April 13, 1960 George Spiros was again interviewed concerning the possibility that he may have remembered something more about the cars. "He was very confused about everything". "The more I think about the thing the more confused I have become about the whole thing. I'm not sure of anything that I may have seen on that day. I know that originally I told you fellows that after lunch I went to Evanston but after thinking over the matter I remembered that I had started to leave the lodge but then returned to the lodge to pick up a box of cigars. I met Dan and Terry Martin standing on the porch having a discussion about a floor that had to be repaired in the Lodge. On my way out is when I saw the cars parked near Harbeck. The more I think about it the more I'm not sure of what I saw there. It seems that the more I think about it the more I put Starley (Tucker) and Chester (Weger) in that car. I dont know why I put them there but it just seems that they were the ones that were in that black Cadillac.

At this time George was approached about his red jackets. He advised that he had 3 of them and that he would be only to happy to give us samples of the fuzz from each one. We then went to his home where he had the jackets. One of them was a red shiny material with a mouton collar. An attempt was made to take some of the material but none of it could be pulled out.

The second jacket was a wool jacket with 3 colors, red, black and a combination red and black. A sample of each was ~~a~~ color was obtained and these were turned over to Sgt. Hall, for comparison with the fuzz that was found in the cave. George stated that the third jacket was in Evanston and that this one was the same color and material as the one the samples was obtained from.
